

# PAGSIP NEWSLETTER

Purdue Association of Graduate Students in Industrial-Organizational Psychology

## Current PAGSIP Members at Purdue

### Faculty

Louis Tay

Sang Eun Woo

Franki Kung

Alex Harris-Watson

Brooke Macnamara

### Graduate Students

Dante Bruno

Daphne Hou

Mia Kendrick

Gloria Liou

Jeffrey Masser

Brad Pitcher

Victoria Scotney

Meaghan Tracy

Rick Yang

Fanyi Zhang

## Letter from the Editor

*Dear Alumni and Friends of Purdue,*

*The past year has been filled with exciting leaps forward for the Purdue I-O family! We have much to share in this edition of the annual PAGSIP Newsletter including numerous student job highlights (pg. 2), new faculty (pg. 5), upcoming SIOP presentations (pg. 17), and so much more. You can also find more information on the [Purdue I-O Psychology program website](https://www.purdue.edu/iop/psychology-program) and our social media platforms.*

*Thank you for your continued support as a member of our Boilermaker family!*

*Meaghan Tracy, Newsletter Editor*

# Meet Our New Student

## Jeffrey Masser

Hey everyone, my name is Jeffrey Masser and I'm a second-year student in the Harris-Watson lab. My research interests include personality, teams, leadership, and selection. Before arriving at Purdue, I graduated from and played soccer at the University of North Carolina at Wilmington. Outside of research, I enjoy going to the beach, watching sports, and doing any kind of physical activity. I love dogs, especially my Jack Russell back home in Tampa, Florida. Come say hi at the reception! Email: [jmasser@purdue.edu](mailto:jmasser@purdue.edu)

## Student Career Highlights

Brad Pitcher will be graduating with a Ph.D. in May 2025! He will be continuing his work with Developmental Dimensions International (DDI) post-graduation!

Daphne Hou will be graduating with a Ph.D. in August 2025! She will start her new job as an Assistant Professor in the I-O Psychology program at the University of South Florida this fall!

Rick Yang will be graduating with a Ph.D. in August 2025! He will start his new job as an Assistant Professor of I-O Psychology at Baruch College in City University of New York (CUNY) this fall!

# Alumni Corner

Recently, we reached out to several PAGESIP alumni to share their memories and experiences from their time as graduate students at Purdue. Their words resonated deeply with us, and we hope they do the same for you. Enjoy!

“You couldn’t make a better decision for your career and life than choosing the Purdue I-O department (clearly unbiased!). Honestly though, I truly cherish my time at Purdue—the amazing and supportive faculty, the wonderful students, the small but charming Downtown Lafayette, and even the old Psych building sometimes. Purdue shaped me both personally and professionally, and I’m so proud to be part of this incredible community!”

~ Dr. Stuti Thapa, University of Tulsa

“I loved my time at Purdue! I met life-long friends, and the support of the faculty allowed me to be successful and to figure out how to pursue the balanced life I wanted as a I-O psychologist!”

~ Dr. Nikki Strah, University of North Carolina Charlotte

“I am so grateful that I got to do my PhD in the Purdue I-O program. What I appreciated the most were the people: The faculty, who were not only world class researchers imparting their knowledge to the students, but also cared deeply about each student as individuals, and created space for us to celebrate our wins and share our struggles. The students, who became my friends and cheered me on throughout the program. Their support helped me grow as a researcher, and pursue my career goals as an industry I-O psychologist. I couldn’t have done any of it without them, and even if I had the power to go back in time I would undoubtedly choose Purdue again!”

~ Dr. Sharon Li, Capital One

# Alumni Corner

“My experience in the IO program at Purdue taught me how to think differently about ideas and their impact. I was challenged to think critically about what research was interesting and important, provided access to high-quality methodological training, and given opportunities to work on projects that helped me develop the skills I needed to be successful in my career. The program has faculty who are dedicated to the pursuit of interesting and important research questions, creating an intellectually engaging atmosphere. But more than this, the faculty are dedicated to helping students grow both as scholars and as people. I am deeply indebted to the program and its people for setting me on a path that has led to a rewarding career and life.”

~ Dr. Caitlin Porter, University of Memphis

“My favorite thing about my time in the program was the people. The faculty and students were incredibly welcoming when I joined in 2020. Even though my first few semesters took place during COVID (when in-person interactions were rare), I always felt a sense of belonging because of the program's warm and supportive culture. I am also grateful for the opportunity to learn from Sang, Franki, and Louis. From taking their classes to collaborating on research projects with them, the skills I gained—particularly in research methods and data analysis—have been invaluable in my role as a Research Scientist at Hogan Assessments.”

~ Dr. Jerod White, Hogan Assessments

# Welcome Dr. Alex Harris-Watson!

I'm a new Assistant Professor in I/O. My research focuses on two main areas. First, I study how individual differences (e.g., personality traits and intelligence) shape critical work behavior and performance. I'm especially interested in how traits combine (e.g., trait-by-trait interactions), as well as advancing trait measurement using best practices in psychometrics. Second, I study collaborative relationships central to the future of work, such as teams, leadership, and partnerships between

human and artificial intelligence (AI). In particular, I study AI that is socially interactive (e.g., robots, chatbots) to better understand how people perceive and engage with these agents, including in human-AI teams. Much of my work in also explores how individual differences affect collaborative relationships and AI perception. Before coming to Purdue, I was an Assistant Professor at the University of Oklahoma and a postdoc in the School of Communication at Northwestern University. I completed my Ph.D. in I/O at the University of Georgia and earned by my B.A. in psychology from St. Olaf College in Northfield, Minnesota. When not working, I enjoy cooking and baking, playing games with family and friends, and trying to keep my dog out of trouble. Email: [aharrisw@purdue.edu](mailto:aharrisw@purdue.edu)

# Welcome to Dr. Brooke Macnamara!

I recently joined both the Cognitive and I-O areas at Purdue as an associate professor. This is my first time being part of an I-O program. I received my PhD from Princeton University in 2014 in cognitive psychology and then was faculty at Case Western Reserve University for ten years before arriving at Purdue. I'm interested in predicting skill acquisition, expertise, and achievement, including job performance. The predictors I've studied have ranged from cognitive abilities (e.g., working memory capacity) to experiential factors (e.g., deliberate practice) to beliefs and motivations (e.g., mindset, behavioral inhibition). I'm also interested in how characteristics of the task and environmental factors moderate the importance of these predictors. Relatedly, I'm interested in people's beliefs about the factors that predict success. My research is currently funded by the Army Research Institute (studying cognitive abilities, emotion-cognition traits, and stress on performance depending on characteristics of the task) and the National Science Foundation (investigating how artificial intelligence assistants may hinder learning among trainees and accelerate skill decay among human experts). I'm thrilled to be part of an I-O program and part of Purdue!

# 2025 Ernest J. McCormick Lecture

## Managing an Emotionally Charged Workplace

Alicia Grandey, Ph.D.

**Dr. Alicia Grandey** was named Liberal Arts Professor of Psychology at Pennsylvania State University, after 25 years leading the industrial-organizational program. Dr. Grandey's research (<http://weld.la.psu.edu>) is on work emotions and stress, specifically emotional labor (e.g., "service with a smile") and diversity related mistreatment (e.g., racial incivility, sexual harassment, women's health bias), with many of her 62 publications in top-tier outlets such as Journal of Applied Psychology, Journal of Management, and Personnel Psychology. Her more than 30,000 citations puts her in the top 1% of organizational scientists, and her award-winning research has received funding from the National Science Foundation, and media attention

from outlets like Harvard Business Review, The New Yorker, and CNN, ABC, and NPR. She co-edited *Emotional Labor in the 21st Century* (Routledge) and co-authored *Emotionally Charged: Leading in the New World of Work* (Oxford). Dr. Grandey has mentored over 20 doctoral students and was recognized by Penn State's Eisenhower Distinguished Teaching Award and SIOP's Distinguished Teaching Career Award. Dr. Grandey has received Academy of Management Journal's best reviewer award and currently serves as an Associate Editor for JAP. She is Fellow of the Society for Industrial and Organizational Psychology (SIOP) and the Association for Psychological Science

### Abstract:

Leaders today face unprecedented changes and uncertainty alongside expectations to support worker wellbeing in our diverse and divided society. Yet, leader development and training often ignore the inherent emotional labor of the job and how leaders can support their people - and themselves - in these new conditions. Drawing on her recent book on this topic, emotional labor expert Dr. Grandey will discuss evidence-based strategies for leaders to thrive in the complex emotional landscape at work, and to foster healthy and productive work environments in the 21st century.

# There is Much to Celebrate!

## GRANTS

Army Research Institute Grant (Brook Macnamara; 2022-2025)

National Science Foundation Grant (Brook Macnamara; 2021-2025)

Center for Intercultural Learning, Mentorship, Assessment and Research (CILMAR) Seed Research Grant (Rick Yang, 2024)

## AWARDS & RECOGNITIONS

Daphne Hou received the Dr. William H. Hendrix Industrial-Organizational Psychology Graduate Student Research Excellence Award at Purdue.

Gloria Liou received the 2025 Center for Working Well Research Award, and the Purdue University Graduate Research Innovation Award.

Meaghan Tracy received the Hogan Assessments GSD Intern Award; she is the third intern in the history of the Hogan Assessments Internship Program to receive it!

Rick Yang was honored with the Dr. William H. Hendrix Industrial-Organizational Psychology Graduate Student Research Excellence Award at Purdue, and the Purdue Employee Recognition Award for High-Profile Projects!

Fanyi Zhang was honored with the John C. Flanagan Award for Best Student Presentation at SIOP! She also received an honorable mention for the American Society for Engineering Education (ASEE) Education Research and Methods Best Paper Award.

Dr. Franki Kung was honored with the Sage Early Career Trajectory Award at SPSP! He also received the Faculty Award for Diversity, Equity, Inclusion, and Belonging for Purdue HHS.

Dr. Louis Tay was named a Fellow of the Association for Psychological Association (APA).

## PROGRAM MILESTONES

Congratulations to Fanyi Zhang for passing her preliminary examination last May!

Congratulations to Fanyi Zhang and Gloria Liou on successfully defending their master's theses!

Congratulations to Brad Pitcher for successfully defending his dissertation in February!

## GUEST SPEAKERS

We had the honor of hosting amazing guest speakers in our I-O Colloquium this year:

Dr. Shonna Waters

Mr. Cavan Bonner

Dr. Janaki Gooty

Dr. Alicia Grandey

Dr. David Condon

Dr. George Banks

Dr. Tobias Dennerlein

Dr. Silvia Bonaccio

Dr. James Lebreton
